SUVADEE PHINPRAPHAT: THE STUDY OF INSTRUCTIONAL MEDIA UTILIZATION IN MUSIC FOR ELEMENTARY SCHOOL TEACHERS. CASE STUDY: RATCHABURI ELEMENTARY SCHOOL. THESIS ADVISORS: SPACES ANAK CHARANYANANDA, B.ED., M.M., NARONCHAI PIDOKRAJT, B.ED., M.ED., M.A., SAKCHAI HIRANRAKSA, M.A.

The objective of this research was to investigate and explore the utilization of instructional media for Prathom 3 and 4 music teachers in Ratchaburi Elementary Schools. These can be divided into three aspects namely, 1) current frequency of usage of instructional media and space of time media utilization in music, 2) Problems and obstacles faced when using such media, and 3) To develop such an instructional media a questionnaire of 292 questions was used from grade 3 and 4 elementary school teachers in Ratchaburi province consisting of 9 districts and 1 sub-district, a total of 180 schools.

The result of the research disclosed that:

1. Frequency of usage of these instructional media for teachers was at medium level. The arithmetic mean score was 2.61
2. Problems and obstacles found in using these instructional media were at medium level. The arithmetic mean score was 2.57.
3. The need to develop instructional media is at medium level. The arithmetic mean score was 3.18
