#### Abstract

The purpose of this research was to evaluate the job training of Diploma Students in Metal Technology Field of Technical Colleges in the North-eastern part of Thailand under the Department of Vocational Education. The population was divided into three groups as follows : 54 administrators, 42 related staff and 52 students who had participated in the training programs in 1989.

The major findings of this study, according to the objectives of vocational education, factors of management, job training and the methods of the colleges in providing job training to the students, revealed that in general the procedure of this program as conducted appropriately in terms of its principal, rationale and objectives. Some recommendations for this improvement of the program were that the process of training supervision.
