Abstract

The Purpose of this study was to motive and to protect the squaddle of industrial vocational students in the private industrial vocational schools in Bangkok area, and to find ways protect the squaddle students.

This study covers 26 private industrial vocational schools in Bangkok. Twenty-two sampling schools which squaddle students in the year 1990-1993 from the data of the department of physical education were chosen, and 412 samples were devided into 4 groups : students, advisors, activity teachers and parents.

Three types of questionnaires were constructed, one for the students, the advisors and activity teachers and the parents.

SPSS PC Plus were employed in data analysis. The statistical method employed in analysis of the data were f, % x, S.D. and Multiple Regression Analysis.

The Results of the study were as follows :

1. "Senior students gave bad motivation to junior"
2. "The students, who did not live with parents were found uncontrolled and caused squaddeley" but "Games among the institutes" was not found significancelly.

3. "Religion activities and ways to protecting bad behavior by students themselves" were found significantly to protect the squaddle of industrial vocational students.

4. "The cooperation among institute was found to help provide information among industrial vocational schools to protect the squaddle of industrial vocational students.
