This study examined the efficiency of the instructional package and compared the results of pre-test and post-test of a construction of the extra curricular activities instructional package of “ A Thai Khlui Playing for the students in Primary School.”

The study consisted of 3 schools at Prathomsuksa 5 level in Borommathat School Cluster, under the office of the Muangchainat District Primary Education, Chainat Provincial Primary Education Commission. These schools were Wat Phang School, Wat Songkob School, and Luang Por Khao School. There were 51 students. The experiment was done in 36 periods. The data was collected from a pre-test, a post-test, the exercises of practical playing, Khlui Thai step 1-4, the exercises of practical Thai keynotes and the exercises of practical songs.

The result indicated that there is 90.86/89.87 of the pre-test and post-test evaluation, which this calculated ratio was higher than the stipulate rate at 80/80. The efficiency of post-test of the subject groups who studied a construction of the extra curricular activities instructional package of “ A Thai Khlui Playing ” was higher than pre-test. It was noted that the t - test was 46.43. It was significant at the level of .01.
