The purpose of this experimental research is to instruct and study the efficiency of an instructional package concerning texture by listening skills for the students in Rajabhat Institute Pibulsongkram.

The samples used in this study were 110 students of the following programs : Special Education / 98, Community Development / 97 Elementary Education / 98 Community Development / 98. The duration utilized in experiments was 4 times each for 2 periods (100 minutes) The instruments used in this research were an instructional package pre-test and post-test developed by the researcher. Percentage, Arithmetic Mean, Standard deviation and T-test were used for data analysis

The results of the study found that

1. The efficiency of the instructional package was 81.67 / 80.00, 81.44 / 80.00, 82.00 / 80.67, 81.67 / 80.50 respectively for the above programs.
2. The results of pre-test and post-test after using the instructional package were higher than before using it and they were statistically significant at .01 Level .
