ENGLISH ABSTRACT	ii
THAI ABSTRACT	iii
ACKNOWLEDGEMENTS	iv
CONTENTS	v
LIST OF TABLES	vii
LIST OF FIGURES	viii
LIST OF SYMBOLS	ix
LIST OF TECHNICAL TERMS AND ABBREVIATIONS	x
CHAPTER	
1. INTRODUCTION	1
1.1 Rational/Problem	1
1.2 Cloud	1
1.3 Thunderstorm	1
1.4 Fractal	2
1.4.1 Regular Dimension	2
1.4.2 Fractal Dimension	3
1.4.3 Calculation of Fractal Dimension	4
1.4.3.1 Box – Counting Method	4
1.4.3.2 ε – Blanket Method	5
1.4.3.3 Bouligand – Minkowski Method	6
1.4.3.4 Compass Method	7
1.4.3.5 Area – Perimeter Method	8
1.5 Literature Review	9
1.6 Objectives	11
2. THEORIES	
2.1 Sierpinski Triangle	12
2.2 Fractal Objects : Iterative Construction of Sierpinski Triangle	13
2.3 Linear Regression Analysis	14
2.4 Area – Perimeter Method	14
2.5 Satellite Images	16
2.5.1 Infrared (IR) Images	16
2.5.2 Geostationary Meteorological Satellite – 5 (GMS – 5)	16
3. METHODOLOGY	
3.1 Severe Thunderstorm Cases	18
3.2 Steps of Fractal Dimension Approximation	21
3.2.1 Step 1	21
3.2.2 Step 2	22
3.2.3 Step 3	23
3.2.4 Step 4	23
3.2.5 Step 5	24
3.3 Overlapping Area – Perimeter Method	29
3.4 Experiments Cases	30

	PAGE
4. RESULTS AND DISCUSSION	
4.1 Cloud Area	32
4.2 Fractal Dimension of Severe Thunderstorm Clouds	33
4.2.1 The Case of 17 April 2002	34
4.2.2 The Case of 24 July 2002	34
4.3 Fractal Dimension of Large and Small Severe Thunderstorms Clouds	38
4.4 Fractal Dimension of Non-severe Thunderstorms Clouds	39
5. CONCLUSION AND RECOMMENDATION	
5.1 Conclusion	41
5.2 Recommendation	41
REFERENCES	42
APPENDIX A Areas of Severe Thunderstorm Clouds	45
APPENDIX B Areas of Non-severe Thunderstorm Clouds	49
BIOGRAPHY	52
