### Abstract

This study was a survey on the general situation of the coordination problems between Area Vocational Centers and Feeder Schools on three aspects : academic, student administration and guidance. The purposes of this research were to investigate the situation of the problems and nature of the coordination.

The population were 840 administrators and teachers in Area Vocational Centers and Feeder schools. The instruments were the questionnaires. Statistical procedures used were percentage, means and Standard deviation.

The findings were that in term of practice, coordination between Area Vocational Centers and Feeder schools was rare. Coordination aspect which was rated as high was academic and the lowest was guidance. The problems of coordination as a whole were considered serious. The most serious problems of the coordination was student administration and the least was academic.
