Academic year : 1991

Abstract

The objective of this study was to find out the opinions on educational services of the Industrial Technology continuing students studying in academic year 1990 at Phranakorn United College.

Students in the Field of Industrial Technology were used in this studying. One thousand questionnaires were sent to the students and 884 of them were returned making 88.4 %. The data were analyzed by using Percentage, Arithmetic Mean and Standard Deviation.

The research results revealed low rating in overall categories of the education services as shown from high to low as follows:

1. The academic affairs service shown high in education plan and policy and shown low in the media service.
2. The student activities service shown high in students committee service and shown low in the materials and supplies, tools, and activity areas.
3. The student welfare service shown high in library and shown low in the building facilities.
