

ACKNOWLEDGEMENT

This thesis would not have been finished without the encouragement, valuable comments and suggestions of an uncountable number of people and institutions. I hereby would like to take this opportunity to acknowledge my sincere gratitude to all of them.

First of all, I wish to express my deepest thanks to Ajarn Dr. Bhanupong Nidhiprabha, the advisor and chairman of my thesis committee, for his generous guidance, invaluable suggestions and giving me opportunities to reach its destinations. He is also a role model of being an economist and a lecturer, not ‘*a technician*’ only. Without his contribution, this thesis would not have been completed.

I am also grateful to Ajarn Dr. Damisa Mookmanee and Ajarn Supanit Tangsangasaksri, the members of my thesis committee, for devoting a great deal of their time to read and giving their constructive comments for improving this thesis.

I would like to take this opportunity to extend my gratitude towards to Thammasat University for granting me the scholarship award of M.A. Program.

Most importantly, my profound appreciation and gratitude go to Ajarn Pimnipa and the Khumpradith Family who provided me all opportunities, great encouragements and their unconditional love and supports throughout my life.

However, there may be other people who have contributed to this work not mentioned here to whom I want to say ‘Thank you’ to all of you.

I also would like to thank my seniors - Supanee, Wittawat, Anuwat, Chusak, Yookol, Ajchara and my friends at graduate program – Paritat, Thanyaporn, Alongkorn, Supawat, Chayanee and Panda for 3 years that have emerged a long story in our friendship.

Finally, any mistake and deficiencies in this thesis, I take all responsibilities.
