ABSTRACT

The purposes of this study were to construct and experiment to test the effectiveness of a sound-slide cartoon on "Avoided food" for Pratom Sixth Student. The sound-slide cartoon, which contains 42 cartoon film frames, was tried out three times with Pratom Sixth Student at Ban Khammuang school, Amphoe Khamkhuenkaew, Changwat Yasothon and Sarnbin School and Anubankhonkaen School, Amphoe Mueng, Changwat Khonkaen. And which the adjustments in each school will be made after the test of effectiveness was over.

The experimental group was 45 pratom sixth students Kumnongkhu School, Amphoe Mueng, Changwat Khonkaen.

After the experiment the mean achievement score of the pretest (11.40) and the mean achievement score of the posttest (12.96) were compared. It was concluded that there was a significant difference at the 0.01 level.

The survey of the teachers' opinions about the sound-slide cartoon : pictures, content, language used, and sound were considered to be excellent and good. The students' opinions were favorable regarding the colour cartoon pictures presented. They also claimed to have improved their knowledge and understanding of the subject and stated that they enjoyed watching it.
