

ACKNOWLEDGEMENTS

As the author, I would like to thanks my advisor, Assoc. Prof. Dr. Paitip Thiravetyan, Division of Biotechnology, School of Bioresources and Technology, King Mongkut's University of Technology Thonburi, for her guidance, suggestions, assistance and facilities in the experiments.

Appreciation and gratitude are also due to the member: Assoc. Prof. Dr. Pawinee Chaiprasert and Asst. Prof. Dr. Kanokwan Poomputsa, Division of Biotechnology, School of Bioresources and Technology, King Mongkut's University of Technology Thonburi, for their kind attention and suggestion in the progress examination and thesis defense. I am also grateful to my external committee, Assoc. Prof. Dr. Warawut Suadee, Department of Environmental Sciences, Thammasat University.

I would like to extend my special thanks to Assoc. Prof. Dr. Alisa Vangnai, Department of Biochemistry, Faculty of Science, Chulalongkorn University for providing the *P. aeruginosa*.

Many thanks are due to the staffs and friends in the Remediation Laboratory, School of Bioresources and Technology, King Mongkut's University of Technology Thonburi for their help in the experiment work.

Last of all, I would to express my gratitude to my family, for their care, understanding, kindness helping and encouragement during my study period.
