Date of Graduation	November 28, 1988

## ABSTRACT

The objective of this study was to find out factors which cause problems and obstacles in education administration of Police Education Bureau and police officers' attitude toward the mentioned factors.

151 questionnaires were collected from police officers working at headquarter of Education Bureau Police Department.

Two main factors causing those problems & obstacles, firstly, the administrative structure of Police Education Bureau ; secondly, the administration and management in Education Planning Division.

The first factor deal with the insufficient administrative officer working in policy arrangement, planning, analysis and evaluation of the bureau. Furthermore, Education Planning Division had an ambiguous scope of work and responsibility not corresponding to the real work and insufficient administrative officer working in personnel & budgetting administration, policy arrangement, planning, analysis of work, evaluation and welfare of the division.

The second factor deal with the lack of budget, needed instruments, training course for capability improvement, system of supervision and some negative attitude toward the division i.e. staying around await for other promotion.

Attitude toward those factors were vary to position, period of working experience and education. Group of non-commissioned officers, having below 10 years of working experience and diploma degree had an uncertain idea toward those factors i.e. insufficient administrative officer, personnel administration, analysis & evaluation of work.
