ACKNOWLEDGEMENTS

This thesis was successfully completed because of great assistance and support from many people. I hereby would like to express a sincere appreciation to all of them.

I would like to express the deep gratitude to major advisor Lecturer Suwit Charoensak for the advice and precise correction of the work. The same goes to co-advisor Assoc. Prof. Theerapol Witthiwej who dedicated his time for this thesis, helped for his advice of patient's data collection, help contact with patient's ward. Moreover, he also gave me the tips of brain tumor diagnosis included with the way to indicate position of tumor

Thank you Assoc. Prof. Dr. Sucheera Phattharayuttawat, the chair of the thesis defense and CEPT. Assoc. Prof. Sookjaroen Tangwongchai, an external examiner of the thesis defense, who were a big part of making this thesis complete by providing useful advice and instructions.

Another group of people whom I would like to express an appreciation to is Ms. Supatra Chuenberkban, Ms. Nunthaporn Wongura, and Ms. Saowanee Meenumguen from the Department of Psychiatry for facilitating me and cooperating with professors and other departments during the time of studying. Thank you the Faculty of Medicine, Siriraj Hospital for the 'Siriraj Graduate Scholarship' and 'Siriraj Graduate Thesis Scholarship'. It is highly and deeply appreciated.

Thank you Ms.Ratchanok Hongsawinitkul for her morale that makes me keep on moving forward included with her advice on English language

This work would not have been successfully completed without good cooperations from the respondents of patients who consented for the data collection

Last but not least, thank you all the classmates, colleagues, and family for the great support and help from the beginning until the present.

Porndara Teekun
