ABSTRACT

The purpose of this research was to construction instructional package on man and natural environment in life experience group for Prathom Suksa I students. The efficiency ratio at 80 / 80 criterion and its effectiveness index of 0.50 up were required for the package.

The instrument used in this research were the instructional package on man and natural environment in life experience group for Prathom Suksa I students which consists of 9 lesson plans, and the 20 items of achievement test which had the range of difficulty (p) of 0.27 - 0.85, the discrimination (r) of 0.22 - 0.57, and the reliability of 0.71. This instructional package was tried out and tested its efficiency and effectiveness index with 41 students from Bannachumsaeng School Group, Amphur Phuwieng, Changwat Khon Kaen.

It was found that the instructional package on man and natural environment in life experience group for Prathom Suksa I students, had effectiveness index at 0.58. Moreover, the result indicated that it had efficiency ratio at 82.08 / 86.75 higher than the required criterion.
