ABSTRACT

The purposes of the present study were to construct comic lessons on democratic way of life for Mathayom Suksa I (Grade 7) students and to investigate the students' opinion of the lessons.

The sample consisted of 52 randomly selected Mathayom Suksa I students of Samrongtab Wittayakom School, Samrongtab District, Surin Province. The instruments used in the study which were constructed by the researcher himself included: 1) ten comic lessons on democratic way of life; 2) a 40-item test with a reliability of .91; 3) ten lesson plans applying the ten comic lessons; 4) a questionnaire to elicit the students' opinion of the comic lessons on democratic way of life. A One-Group Pretest-Posttest Design was employed in this study.

The findings showed that the comic lessons on democratic way of life as constructed had an efficiency ratio of 89.93/88.06 which was higher than the expected ratio. The majority of the students expressed a “good” level of opinion for the comic lesson on democratic way of life.
