### ABSTRACT

Divergent problems of human behavior in existing society seem to be such a cruel violation of child human rights. Children have become the victims of those with abnormal behavior in the present situation, especially the girls who have been brutally treated as sexual material. Ruthless treatment of children rape, abuse and holding children for prostitution are significant problems in the present society. These sad crises are very important and so are the principle subjects inspiring a creation of Graphic Arts on this Thesis which illustrates the concept of this worsening situation in society towards children. "Babies' Shoes" was chosen as a symbol representing the sad emotional effects of these situations, under the title of "Victim : Contemporary Juvenile Society"
