

Thesis Title	Learning Achievement of Nonformal Education Graduates in Silpakorn University.
Name	Miss Hansa Navayon
Concentration	Adult and Continuing Education
Department	Nonformal Education
Academic Year	1989

#### ABSTRACT

The purpose of this study was to study the student factors and learning achievement of nonformal education graduates in Silpakorn University.

The sample used in this study was 102 students enrolled in the 1987 - 1989 academic years. Data was collected by a questionnaire which involved information on personal backgrounds family income, parents occupation and grade point average.

The obtained data was analysed by percentage, mean, and standard deviation.

The results of the study were summarized as follows:

1. Regarding student factors, it was found that 61.76 percent of nonformal education graduates in Silpakorn University were female, the average age of these student was 17 years old, the majority of students in Tapra campus came from Bangkok area while the majority of students in Snamchandra Palace campus came from Western provinces Family incomes of students in the Faculties of Architecture, Arts,

Science, and Pharmacy were at a high level while the Faculty of Education was at the low level. Concerning students expenditures received from parents, ranked from highest to lowest were the students in the Faculties of Architecture, Archaeology, Decorative Arts, Arts, Science, Pharmacy and Education. Ninety two percent of these students enrolled in the University through the examination administered by the Ministry of University Affairs.

2. In the Analysis of academic achievement of these nonformal education graduates, it was found that the achievement of the students from Faculties of Architecture, Archeology, Decorative, Arts, Education, Science and Pharmacy at a moderate.
