ACKNOWLEDGEMENT

I would like to express my sincerest gratitude to my supervisor, Assist. Prof. Dr. Patrapon Kamonpet, Prof. Dr. Pradit Terdtoon and Prof. Dr. G.S.V. Raghavan, for the timely advise and the support during the entire period of my project work. All the things they have done for me is much more than what I can express through words. I would like to thank Assit. Prof. Dr. Wiwat Klongpanich, Dr. Nut Vorayos and Dr.Zaman Alikhani, for then invaluable suggestion and advice on my thesis. I am grateful to Assoc. Prof. Dr. Sumpun Chaitep, who is always very kind and permitted me to use the laboratory of the Department of Agriculture Engineering, Faculty of Engineering, Chiang Mai University. I wish to thank the Ministry of Science and Technology of Thailand, which supported this project. I would like to thank every body in Mechanical Engineering who gave a chance for me to study and also for providing the necessary departmental equipment for my research work. I also thank every body in the heat pipe laboratory for helping me whenever I had a problem during my study. Finally, I would like to thank my parents and my family for all the things during my doctoral research work.

Wera Phaphuangwittayakul
