ABSTRACT

The purposes of this research were to study the problems and the requirements about the village reading center of the committee in the village reading center and the people using the village reading center ; and to compare the problems and the requirements of the committee and the people using toward reading center. The problems and requirements consisted of 4 aspects of general environment, equipment and necessity, participation, and activities. The sample in this research was randomed from the people in the districts that has the village reading center. It consisted of the committee of the village reading center and the using people in the village reading center. The 31 village reading center are 25 percent samples that are randomed from the village reading center in each Amphur and from each village reading center, 4 committees and 4 people using the village reading center were randomed and interviewed by the structural interview form. The data was analyzed by mean, percentage and t-Test. The findings were as follows :

Both the committee and the people using village had the same opinion towards the problem and requirement in general environment equipment and necessity. The cleanliness and sufficiency of the book shelves were the most important problem. In regard to participation a providing of equipment was the most important problem. In regard to activity, arranging daily information board was the most important problem for the committee and book keeping system in village reading center was the most important problem for the people using village reading center.

The requirement of the committee concerning general environment was a decorating village reading center, but the people using village reading center required a cleanliness of the reading center. With respect to the equipment and necessity. The committee required to keep the old volume of newspaper in the village reading center but the people using the center required to keep all books and printing materials at the reading center. In regard to participation both committee and people using the service had the same requirement in receiving services of the village reading center. With respect to the activity both committee and people using village reading center had the same requirement concerning a preparation of village's data and information of the center.

A comparison of problems and requirements in village reading center between the committee and people using the service in four aspects revealed no significant different at .05 level.
