

## LIST OF FIGURES

<b>Figures</b>	<b>Page</b>
3.1 Possible mechanisms of reactive microgliosis drives progressive neurotoxicity	5
3.2 Microglia PRRs indentify neurotoxic and pro-inflammatory ligands	9
3.3 Intracellular ROS regulate microglial activation	9
3.4 Life cycle of Japanese encephalitis virus. Human is the accidental-dead end host. Pigs play a central role in the transmission JEV	11
3.5 Illustrated pathway of JEV-induced apoptosis in human promonocyte cells.	12
3.6 Dengue virus's life cycle	13
3.7 Immunopathogenesis of severe dengue-an integrated model	14
4.1 Experimental flow chart for experiment 1	22
4.2 Experimental flow chart for experiment 2	23
4.3 Experimental flow chart for experiment 3	24
5.1 Morphological of HAPI cells growth under normal condition.	25
5.2 Cell viability of HAPI cells growth under the control condition.	26
5.3 Comparison of cell viability of various cell passages. Passage 41 and 43 under control condition at 6, 24, 48 and 72 hours and Passage 36- 43 at 24 hours	27

## LIST OF FIGURES (cont.)

<b>Figures</b>	<b>Page</b>
5.4 Effect of t-Butyl OOH on microglia viability and ROS production	28
5.5 Effects of LPS on microglia viability and ROS production	29
5.6 Effects of Japanese encephalitis virus (JEV) on cell viability and ROS production in HAPI cells.	31
5.7 Effects of Culex flavivirus (CxFV) on cell viability and ROS production	32
5.8 Effects of Dengue-2 virus (DENV-2) on cell viability and ROS production	33
5.9 Effects of Dengue-4 virus (DENV-4) on cell viability and ROS production	34
5.10 Effects of flavivirus at <u>MOI of 0.01</u> on microglia viability and ROS production	35
5.11 Effects of flavivirus at <u>MOI of 0.1</u> on microglia viability and ROS production	36
5.12 Microscopic observation of HAPI cells growth under control (untreated) and treated with LPS 1 µg/ml.	40
5.13 Microscopic observation of HAPI cells after activation of JEV and CxFV.	41
5.14 Microscopic observation of HAPI cells after activation of DENV-2 and DENV-4.	42
5.15 Effect of flavivirus activation on iNOS expression in HAPI cells.	43
5.16 Effects of flavivirus on expression and activation of - caspase-3 (cleaved caspase-3) (b) in HAPI cells.	45
