### **(Abstract)**

The purposes of this study are to study and collect the data of cultural landscapes and to develop cultural tourism in Puyu subdistrict, Muang district, Satun province. Data of cultural landscapes were collected by 24 of students and teachers of Ban Koh Yao school and Ban Tunyong Kaboi Chaipathana school as well as the brain storming of 45 people from 3 villages of Puyu subdistrict. It found that cultural landscapes were divided into 2 groups, 1) relict cultural landscapes namely, ruin of ship, ruin of charcoal kiln, Koh Yao custom building, and 300 years well and 2) dynamic cultural landscapes namely, coastal fishery, fishery boat, traditional Muslim house, light house and tri-cycles.

The development of cultural tourism in Puyu subdistrict focused on participation of community in identify and select cultural landscapes for set up cultural tourism program. Then the cultural tourism program was tested by 15 voluntary tourists. It found that the satisfaction of tourists was in medium level is 3.10. Puyu Administrative Organization and related organizations should cooperative with community to promote and support the tourism that truly community based management. This is for maintain value and important of culture and local way of life.
