ACKNOWLEDGEMENTS	iii
ABSTRACT (ENGLISH)	iv
ABSTRACT (THAI)	v
LIST OF TABLES	viii
LIST OF FIGURES	xi
CHAPTER I INTRODUCTION	1
1.1 Background and significance	1
1.2 Objective of the study	2
1.3 Scope of the study	3
1.4 Expected results	3
1.5 Conceptual framework	4
CHAPTER II LITERATURE REVIEWS	5
2.1 Situation of greenhouse gas emissions	5
2.2 Carbon sequestration	9
2.3 Factors effecting on carbon sequestration	14
2.4 Public park	18
2.5 Study area	21
CHAPTER III MATERIALS AND METHODS	24
3.1 Data collection	24
3.2 Materials	24
3.3 Methods	25
3.4 Estimation of carbon storage	28
3.5 Statistical analysis	30

CONTENTS (cont.)

	Page
CHAPTER IV RESULTS AND DISCUSSION	31
4.1 Plant characteristics, soil properties and carbon storage	31
4.2 Factors effecting on carbon sequestration of the parks	72
4.3 Management approach to enhance in the carbon sequestration in the parks	81
CHAPTER V CONCLUSION AND RECOMMENDATION	82
5.1 Conclusion	82
5.3 Recommendation	83
REFERENCES	84
APPENDICES	93
Appendix A	94
Appendix B	98
Appendix C	101
Appendix D	122
Appendix E	145
Appendix F	152
BIOGRAPHY	159

LIST OF TABLES

Table	Page
2.1 The emitted amount of CO ₂ in major cities in 2005.	8
2.2 Greenhouse gas emission in production section	9
2.3 The main parks in the responsibility of Environment Department, Bangkok	19
3.1 Method of soil properties analysis	27
4.1 Plant species were studied in Lumpini park	32
4.2 Quantitative characteristics of plant in each plot in Lumpini park	33
4.3 Soil properties in tree-planting area and turf in Lumpini park	34
4.4 Soil properties of tree-planting area in each plot in Lumpini park	40
4.5 Above-ground biomass and carbon storage in each plot in Lumpini park	41
4.6 Litter fall biomass and carbon storage in each plot in Lumpini park	43
4.7 Grass litter biomass and carbon storage in Lumpini park	44
4.8 Soil organic carbon storage in each plot in Lumpini park	45
4.9 Soil organic carbon storage in turf in Lumpini park	46
4.10 Total carbon storage in each plot in Lumpini park	47
4.11 Total carbon storage of tree-planting area and turf in Lumpini park	48
4.12 Plant species were studied in Vachirabenjatas park	49
4.13 Quantitative characteristics of plant in each plot in Vachirabenjatas park	51
4.14 Soil properties of tree-planting area and turf in Vachirabenjatas park	53
4.15 Soil properties of tree-planting area in each plot in Vachirabenjatas park	59
4.16 Above-ground biomass and carbon storage in each plot in Vachirabenjatas park	61

LIST OF TABLES (cont.)

Table	Page
4.17 Litter fall biomass and carbon storage in each plot in Vachirabenjatas park	63
4.18 Glass litter biomass and carbon storage in Vachirabaenjatas park	64
4.19 Soil organic carbon storage in each plot in Vachirabaenjatas park	65
4.20 Soil organic carbon storage in turf in Vachirabenjatas park	66
4.21 Total carbon storage of tree-planting area in each plot in Vachirabenjatas park	67
4.22 Total carbon storage of tree-planting area and turf in Vachirabenjatas park	68
4.23 Carbon storage in the public parks	69
4.24 The multiple correlation coefficient (R) and the multiple adjusted correlation of determination (R_a^2) showed the relationship between vegetation and total carbon storage in tree-planting area in Lumpini park	72
4.25 The standardized regression coefficient (Beta) showed the relationship between each factor of vegetation and total carbon storage in tree-planting area in Lumpini park	73
4.26 The multiple correlation coefficient (R) and the multiple adjusted correlation of determination (R_a^2) showed the relationship between soil properties and total carbon storage in tree-planting area in Lumpini park	73
4.27 The standardized regression coefficient (Beta) showed the relationship between each factor of soil properties and total carbon storage in tree-planting area in Lumpini park	74

LIST OF TABLES (cont.)

Table	Page
4.28 The multiple correlation coefficient (R) and the multiple adjusted correlation of determination (R_a^2) showed the relationship between soil properties and total carbon storage in turf in Lumpini park	74
4.29 The standardized regression coefficient (Beta) showed the relationship between each factor of soil properties and total carbon storage in turf in Lumpini park	75
4.30 The multiple correlation coefficient (R) and the multiple adjusted correlation of determination (R_a^2) showed the relationship between vegetation and total carbon storage in tree-planting area in Vachirabenjatas park	76
4.31 The standardized regression coefficient (Beta) showed the relationship between each factor of vegetation and total carbon storage in tree-planting area in Vachirabenjatas park	76
4.32 The multiple correlation coefficient (R) and the multiple adjusted correlation of determination (R_a^2) showed the relationship between soil properties and total carbon storage in tree-planting area in Vachirabenjatas park	77
4.33 The standardized regression coefficient (Beta) showed the relationship between each factor of soil properties and total carbon storage in tree-planting area in Vachirabenjatas park	77
4.34 The multiple correlation coefficient (R) and the multiple adjusted correlation of determination (R_a^2) showed the relationship between soil properties and total carbon storage in turf in Vachirabenjatas park	78
4.35 The standardized regression coefficient (Beta) showed the relationship between each factor of soil properties and total carbon storage in turf in Vachirabenjatas park	79

LIST OF FIGURES

Figure	Page
1.1 Conceptual framework for the study	4
2.1 Total volume of global CO ₂ emissions	5
2.2 Global CO ₂ emission per capita	6
2.3 Amount and ratio of Thailand's categoried national greenhouse gas emission in 2010	7
2.4 Amount of the greenhouse gas being emitted and stored in 2000-2010	8
4.1 The average BD in each plot in Lumpini park	35
4.2 The average pH in each plot in Lumpini park	36
4.3 The average OM in each plot in Lumpini park	37
4.4 The average TN in each plot in Lumpini park	38
4.5 The average C:N ratios in each plot in Lumpini park	39
4.6 Above-ground carbon storage in each plot in Lumpini park	42
4.7 Carbon storage in litter fall in each plot in Lumpini park	43
4.8 Soil organic carbon storage in each plot in Lumpini park	45
4.9 Total carbon storage in each plot in Lumpini park	48
4.10 The average BD in each plot in Vachirabenjatas park	54
4.11 The average pH in each plot in Vachirabenjatas park	55
4.12 The average OM in each plot in Vachirabenjatas park	56
4.13 The average TN in each plot in Vachirabenjatas park	57
4.14 The average C:N ratios in each plot in Vachirabenjatas park	58
4.15 Above-ground carbon storage in each plot in Vachirabenjatas park	62
4.16 Carbon storage in litter fall in each plot in Vachirabenjatas park	64
4.17 Soil organic carbon storage in each plot in Vachirabenjatas park	66
4.18 Total carbon storage in each plot in Vachirabenjatas park	68
