

ACKNOWLEDGEMENTS

I would like to express my deepest gratitude and sincere appreciation to my advisor, Associate Professor Dr. Kanokwan Jarukamjorn, for her continuous supports, limitless encouragement, excellent guidance, and understanding throughout the course of my PhD studying in Khon Kaen University. She provided a perfect environment for me to grow as a scientific researcher and a mature individual.

I am especially grateful to Professor Dr. Nobuo Nemoto, Head of the Department of Toxicology, University of Toyama, Japan, for his guidance, supportive encouragement, and numerous helpful suggestions. His stimulating in-depth discussions on a wide variety of topics will be always remembered.

Special thanks are given to Dr. Sachiko Kondo and Associate Professor Dr. Tsutomu Sakuma, Department of Toxicology, University of Toyama, Japan and Associate Professor Dr. Thewarach Laha, Department of Parasitology, Faculty of Medicine, Khon Kaen University, Thailand. I have learnt a lot from them. Their friendship and helps are unforgettable.

I would like to thank the Office of the Higher Education Commission, Thailand for funding under the program Strategic Scholarships for Frontier Research Network for the Ph.D. Program Thai Doctoral degree.

I am indebted to the Office of National Research Council of Thailand and Graduate School, Khon Kaen University for partial granting in this project.

I also wish to thank staffs of Faculty of Pharmaceutical Sciences, Khon Kaen University, especially Ms. Rutchayaporn Anorach, for helps and supports.

The happy time and sharing knowledge with all members of Research and Development in Pharmaceutical program, Khon Kaen University, and all members of Department of Toxicology, University of Toyama, Japan, are also valuable and unforgettable.

Finally, I extensively express my warmest thanks to my family for their supports, patience, continuous love, and belief in me.
