

**Goodness Portion to the Present Thesis is Dedicated
for My Parents and Entire Teaching Staffs**

ACKNOWLEDGMENTS

I would like to express my sincere gratitude and appreciation to Associate Professor Dr. Jintanaporn Wattanathorn for her guidance, encouragement, understanding and patience during my study at Khon Kaen University.

Grateful acknowledgments are also made to Assistant Professor Dr. Supaporn Muchimapura, Dr. Wipawee Thukham-mee, Associate Professor Dr. Panee Sirisa-ard and Associate Professor. Kowit Chaisiwamongkol for their generous donation of time and critical reviews of my work.

I wish to express my appreciation to the faculty members in the neuroscience program, department of physiology and integrative complementary alternative medicine research and development center for their valuable advice and assistance.

I am grateful to all of my past and present teachers for their instructions, my friends and members of neuroscience and Integrative Complementary Alternative Medicine (ICAM) Research and Development Center of Khon Kaen University. I also thank to Research Grant for Graduate student 2012 of National Research Council of Thailand (NRCT), the Higher Education Research Promotion and National Research University Project of Thailand, Office of the Higher Education Commission, through the Food and Functional Food Research Cluster of Khon Kaen University. The Graduate School of Khon Kaen University, Research Affair Division, Faculty of Medicine and the Integrative Complementary Alternative Medicine Research and Development Center, Khon Kaen University, Khon Kaen, Thailand for grants support.

Finally, I would like to express my sincere gratitude and appreciation to my parents and family for their inspiration, love, care, financial support, encouragement and support. Their love and understanding are invaluable.
