ACKNOWLEDGEMENTS	iii
ABSTRACT (ENGLISH)	iv
ABSTRACT (THAI)	v
LIST OF TABLES	xi
LIST OF FIGURES	xvi
LIST OF ABBREVIATIONS	xvi
CHAPTER I INTRODUCTION	1
1.1 Rationales and Justification of Problems	1
1.2 Research Objectives	6
1.3 Scope of Study and Conceptual Frameworks	6
CHAPTER II LITERATURE REVIEW	8
2.1 Solid Waste	8
2.1.1 Definition of Solid Waste	9
2.1.2 Sources of Generation and Composition of Solid Wastes	9
2.1.3 Characteristic of Solid Wastes	13
2.1.4 Waste Generation	14
2.1.5 Storage	15
2.1.6 Collection	16
2.1.7 Transfer and Transportation	17
2.1.8 Reduce, Reuse, Recycling and Recovery	17
2.1.9 Processing and Treatment	18
2.2 Solid Waste Management	19
2.2.1 Solid Waste Generation and Its Characteristics in Developing Countries	19
2.2.2 Potential Waste Generation Trend	21

CONTENTS (cont.)

	Page
2.2.3 Current Solid Waste Management Strategies	21
2.2.4 Problem Associated with SWM	22
2.2.5 Pretreatment Technology Prior to Landfilling	24
2.3 Integrated Solid Waste Management System	25
2.4 Solid Wastes Management: Policies and Strategies or Approaches	30
2.5 Greenhouse Gases and Climate Change	31
2.5.1 The Relationship of Municipal Solid Waste to Greenhouse Gas Emissions	32
2.5.2 Carbon Balance Model	33
2.5.3 Carbon Equivalence of Fuel	39
2.5.4 Carbon Equivalence of Electricity	40
2.6 Methane Emission from Solid Waste Management	40
2.6.1 Determination of Methane Emission Potential by IPCC Method	40
2.6.2 Determination of Methane Emission by Landfill Gas Emission Model (LandGEM)	41
2.6.3 Determination of Methane Emission Rate by Close Flux Chamber Method	42
2.7 Waste-to-Energy Strategy	42
CHAPTER III METHODOLOGY	47
3.1 Selection of Study Area	47
3.1.1 Classification of Municipalities	47
3.1.2 Site Selection of Municipalities	48
3.2 Data Collection and Establishment of Database System	48
3.2.1 Field Survey	49

CONTENTS (cont.)

	Page
3.2.2 Secondary Data	49
3.3 Coefficients of Carbon Equivalence	49
3.3.1 Organic Carbon	49
3.3.2 Fossil Based Production	50
3.3.3 Electricity Generation	50
3.4 Evaluation of Carbon Equivalence	51
3.4.1 Carbon Emission	51
3.4.2 Carbon Fixation	51
3.4.3 Carbon Reduction	51
3.5 Formulation of Carbon-Balanced Equations for Solid Waste Management	52
3.6 Quantification of Carbon Equivalence	54
3.6.1 Solid Waste Generation	54
3.6.2 Waste Composition and Variations	54
3.7 Collection and Transport	55
3.8 Resource Recovery and Recycling	55
3.9 Processing and Disposal	56
3.9.1 Landfilling	56
3.9.2 Mechanical Biological Treatment (MBT)	57
3.9.3 Incineration	58
3.10 Comparative Scenarios	59
CHAPTER IV RESULTS AND DISCUSSIONS	60
4.1 Nonthaburi City Municipality	61
4.1.1 General Data	61
4.1.2 Solid Waste Management in Nonthaburi Municipality	61
4.1.3 Solid Waste Generation and Composition	62
4.1.4 Solid Waste Collection and Transportation of Nonthaburi	63

CONTENTS (cont.)

	Page
MSW	
4.1.5 Energy Consumption and Carbon Emission from the Landfill of Nonthaburi MSW	64
4.1.6 Carbon Balance in Nonthaburi MSWM	65
4.2 Khon Kaen City Municipality	66
4.2.1 General Data	66
4.2.2 Solid Waste Management in Khon Kaen Municipality	67
4.2.3 Solid Waste Generation and Composition	67
4.2.4 Solid Waste Collection and Transportation of Khon Kaen MSW	68
4.2.5 Solid Waste Transfer Station and Transportation of Khon Kaen MSW	69
4.2.6 Energy Consumption and Carbon Emission from the Landfill of Khon Kaen MSW	70
4.2.7 Carbon Balance in Khon Kaen MSWM	71
4.3 Phitsanulok City Municipality	71
4.3.1 General Data	71
4.3.2 Solid Waste Management in Phitsanulok Municipality	73
4.3.3 Solid Waste Generation and Composition	73
4.3.4 Solid Waste Collection and Transportation of Phitsanulok MSW	75
4.3.5 Energy Consumption and Carbon Emission from the Transfer Station	76
4.3.6 Energy Consumption and Carbon Emission from the MBT of Phitsanulok MSW	77
4.3.7 Carbon Balance in Phitsanulok MSWM	78

CONTENTS (cont.)

	Page
4.4 Phuket City Municipality	
4.4.1 General Data	79
4.4.2 Solid Waste Management in Phuket Municipality	80
4.4.3 Solid Waste Generation and Composition	81
4.4.4 Solid Waste Collection and Transportation of Phuket MSW	83
4.4.5 Energy Consumption and Carbon Emission from the Landfill of Phuket MSW	84
4.4.6 Energy Consumption and Carbon Emission from Incineration of Phuket MSW	85
4.4.7 Carbon Balance in Phuket MSWM	86
4.5 Model Development and Evaluation	87
4.6 Comparison of Carbon Balance in 4 Municipalities	90
4.7 Unit Measurement of Carbon Equivalent of MSWM	91
4.8 Waste Recycling Scenarios	92
4.8.1 The Scenarios of Nonthaburi Municipality	92
4.8.2 The Scenarios of Khon Kaen Municipality	93
4.8.3 The Scenarios of Phitsanulok Municipality	94
4.8.4 The Scenarios of Phuket Municipality	95
CHAPTER V CONCLUSIONS AND RECOMMENDATIONS	97
5.1 Conclusions	97
5.2 Recommendations for Further Study	98
REFERENCES	99
APPENDICES	108
Appendix A Solid Waste Management in Nonthaburi Municipality 2008	109
Appendix B Solid Waste Management in Khon Kaen Municipality 2008	116
Appendix C Solid Waste Management in Phitsanulok Municipality 2008	125
Appendix D Solid Waste Management in Phuket Municipality 2008	135

CONTENTS (cont.)

	Page
Appendix E Methane from Landfilling	150
Appendix F Background Calculations	153
BIOGRAPHY	157
