

LIST OF TABLES

Table	Page
2.1 Sources of generation and composition of solid wastes	10
2.2 Wastes generation and characteristics based on income	12
2.3 Typical values of energy content of residential MSW	15
2.4 Waste generations rates of some Asian Countries	20
2.5 Disposal methods of MSW in Asia and Pacific region countries	26
2.6 Carbon equivalence of fuel	40
2.7 Carbon equivalence of electricity	40
3.1 Coefficients of carbon equivalence from organic carbon	50
3.2 Coefficients of carbon equivalence from fossil based production	51
3.3 Comparison of solid waste generation from the municipalities studied	54
3.4 Solid waste composition	55
4.1 Nonthaburi Municipality Solid Waste Composition	63
4.2 Carbon balance of Nonthaburi MSWM	66
4.3 Khon Kaen Municipality Solid Waste Composition	68
4.4 Carbon balance of Khon Kaen MSWM	72
4.5 Phitsanulok Municipality Solid Waste Composition	75
4.6 Carbon balance of Phitsanulok MSWM	79
4.7 Phuket MSW composition	83
4.8 Carbon balance of Phuket MSWM	87
4.9 Comparison of carbon balance from four Municipality	91
4.10 Carbon Equivalent of activities in MSWM	92
4.11 Carbon balance of Nonthaburi MSWM at 10% 25% and 35 % recycle	93
4.12 Carbon balance of Khon Kaen MSWM at 10% 25% and 35 % recycle	94
4.13 Carbon balance of Phitsanulok MSWM at 10% 25% and 35 % recycle	95
4.14 Carbon balance of Phuket MSWM at 10% 25% and 35 % recycle	96
A-1 Solid Waste Generation in Nonthaburi Municipality (2008)	109

LIST OF TABLES (cont.)

Table	Page
A-2 Distance and diesel fuel consumption of collection system in Nonthaburi Municipality SWM (2008)	110
A-3 Carbon emission from solid waste collection system in Nonthaburi Municipality SWM (2008)	111
A-4 Diesel fuel consumption in landfill operation of Nonthaburi Municipality SWM (2008)	112
A-5 Carbon emission from landfill site operation in Nonthaburi Municipality SWM (2008)	113
A-6 Methane and carbon sink from landfill site and recycle in Nonthaburi Municipality SWM (2008)	114
A-7 Scenario at 10% 25% and 35 % recycle of Nonthaburi Municipality SWM	115
B-1 Solid waste generation in Khon Kaen Municipality 2008	116
B-2 Distance and diesel fuel consumption of collection system in Khon Kaen Municipality 2008	117
B-3 Distance and diesel fuel consumption of solid waste at transfer system in Khon Kaen Municipality 2008	118
B-4 Diesel fuel consumption at landfill operation for Khon Kaen Municipality 2008	119
B-5 Carbon emission from solid waste collection system in Khon Kaen Municipality 2008	120
B-6 Carbon emission from transfer station of SWM of Khon Kaen Municipality 2008	121
B-7 Carbon emission from landfill site operation of SWM of Khon Kaen Municipality 2008	122
B-8 Methane and carbon sink from landfill site and recycle in Khon Kaen Municipality SWM (2008)	123

LIST OF TABLES (cont.)

Table	Page
B-9 Scenario at 10% 25% and 35 % recycle of Khon Kaen Municipality SWM	124
C-1 Solid Waste Generation in Phitsanulok Municipality 2008	125
C-2 Distance and diesel fuel consumption of collection system in Phitsanulok Municipality 2008	126
C-3 Distance and diesel fuel consumption of solid waste transfer system in Phitsanulok Municipality 2008	127
C-4 Diesel fuel consumption at MBT operation for Phitsanulok Municipality 2008	128
C-5 Carbon emission from solid waste collection system in Phitsanulok Municipality 2008	129
C-6 Carbon emission from transfer station of SWM of Phitsanulok Municipality 2008	130
C-7 Electricity consumption and carbon equivalent in transfer station and MBT of Phitsanulok MSW 2008	131
C-8 Carbon emission from MBT operation of SWM of Phitsanulok Municipality 2008	132
C9 Methane and carbon sink and recycle from MBT of SWM of Phitsanulok Municipality 2008	133
C-10 Scenario at 10% 25% and 35 % recycle of Phitsanulok Municipality SWM	134
D-1 Solid waste generation in Phuket Municipality 2008	135
D-2 Distance and diesel fuel consumption of collection system in Phuket Municipality 2008	137
D-3 Diesel fuel consumption at landfill operation for Phuket Municipality 2008	137

LIST OF TABLES (cont.)

Table	Page
D-4.1 Total quantity of Solid Waste from Phuket province operate by Phuket Municipality	138
D-4.2 Electricity production and carbon equivalent from incinerator by using solid waste as a fuel in Phuket province operate by Phuket Municipality	139
D-4.3 Electricity use in Phuket Municipality incinerator	140
D-4.4 Electricity sale to PEA from Phuket Municipality incinerator	141
D-4.5 The quantity and electricity production from Phuket Municipality solid waste proportional to solid waste from Phuket province.	142
D-4.6 The quantity of electricity and carbon equivalent use in incineration proportion of solid waste from Phuket Municipality.	143
D-4.7 Diesel fuel consumption and carbon equivalent of Phuket MSW incineration	144
D-5 Carbon emission from solid waste collection system in Phuket Municipality 2008	145
D-6 Carbon emission from landfill site operation of SWM of Phuket Municipality 2008	146
D-7 Methane and carbon sink from landfill site and recycle of SWM of Phuket Municipality	147
D-8 Scenario at 30% 50% and 70 % recycle of Phuket Municipality SWM	148
D-9 Carbon from fossil and from organic carbon emitted from incinerator and recycle of SWM of Phuket Municipality (Incineration)	149
E-1 Methane from landfilling	154
E-2 Carbon storage for solid waste components	155
E-3 GHG emissions for recycling (MTCO ₂ E/Short ton of material recovered)	156
