Questionnaire

**Factors Influencing Tourism Demand of International
Tourist Arrivals to Chiang Mai Province, Thailand**

My name is Arreyah Chaitip, M.A. (Master in Economics) student at Faculty of Economics, Chiang Mai University, Thailand. I am currently doing a research in topic “**Factors Influencing Tourism Demand of International Tourist Arrivals to Chiang Mai Province, Thailand**”. This study has two objectives. The first objective is to understand the socio-economic background of the international tourist arrivals to Muang District, Chiang Mai province. The second objective is to identify the causal relationships between variables of the Structural Equation Model used in this study.

The following questionnaire has been developed to explore the causal relationships between variables of the Structural Equation Model. A questionnaire has been carried out for research and analysis usage. Furthermore, this questionnaire is designed to help our province develop policies about tourism in the future. This questionnaire will take about 15 minutes to complete. Your name and address is NOT required, and all replies are confidential and voluntary.

Please ✓ in the ○ representing appropriate responses for the following items.
