

**Goodness of the thesis is dedicated to my father, mother  
and all of my teachers**

## ACKNOWLEDGEMENTS

I would like to express my deepest and sincere gratitude to my advisor, Associate Professor Dr. Alissara Reungsang for her kindness and to provide an opportunity to be her advisee since I was undergraduate student. I am also grateful for her valuable supervision, valuable suggestions, all kinds of supports, encouragement, guidance and criticism throughout the course of my study.

My greatest appreciation and sincere gratitude are also addressed to my thesis examination committees Assoc. Prof. Dr. Poonsuk Prasertsan, Assoc. Prof. Dr. Pattana Laopaiboon and Dr. Sompong O-Thong for their helpful suggestions and criticisms.

I am sincerely grateful to Asst. Prof. Dr. Paiboon Danvirutai, Prof. Dr. Chiu-Yue Lin and Prof. Dr. Tsuyoshi Imai for their valuable recommendations.

I am also grateful to Department of Biotechnology, Khon Kaen University, Department of Civil and Environmental Engineering, Yamaguchi University, Japan and Department of Environmental Engineering, Feng Chia University for giving me all of knowledge and skills and Dr. Pensri Plangklang for her valuable technical assistance

I would like to express my sincere gratitude to the fundings from the Energy Conservation Promotion Fund, Ministry of Energy, Thailand, Research Group for Development of Microbial Hydrogen Production Process from Biomass, the Commission on Higher Education, Thailand, Feng Chia University (Contract No. 07G27501 and 08G27201), Bureau of Energy, Taiwan (Grant No. 97-D0137-2), Graduate School, KCU and the Office of the Cane and Sugar Board.

Appreciation is also expressed to all staff and members of the Department of Biotechnology for their practical helps, providing the wonderful environment and friendship during the time of this study. My special additional thanks are also to Ms. Mullika Teerakun, Dr. Suksaman Sangyoka, Ms. Piyawadee Sarapirom, Ms. Sureewan Sittijanda, Mr. Ausdawood Areesirisuk, Mr. Samrouy Nangtharat, AR's team Department of Biotechnology, Khon Kaen University and members of the Department of Environmental Engineering, Feng Chia University, Taiwan for their kind supports during experimental operation.

Finally, I would like to express my sincere gratitude and appreciation to dear parents, and also the members of my family for their love, pushing up, cheerfulness, devoting and encouragement throughout my life.

Sakchai Pattra
