

Independent Study Title	Development of an Internet System for Students' Job Training Program Management at the Faculty of Science and Technology, Rajabhat Institute Chiang Rai
Author	Miss Namphung Jantajirakowit
Degree	Master of Science (Information Technology and Management)
Independent Study Advisor	Asst.Prof.Manop Leurcharusmee

ABSTRACT

The purpose of this independent study about the Development of an Internet System for Students' Job Training Program Management at the Faculty of Science and Technology, Rajabhat Institute, Chiang Rai is to develop an Internet System for Students' Job Training Program Management, Faculty of Science and Technology, Rajabhat Institute, Chiang Rai.

Research methodology consisted of studying the original system, collecting data, analyzing the system as well as designing the database system and, finally, developing into a well designed application program.

The development of an Internet System for Students' Job Training Program Management at the Faculty of Science and Technology, Rajabhat Institute, Chiang Rai is based on Windows 95/98 and NT 4.0 operating systems. ASP (Active Server Pages) program is used as development tool whereas MySQL program is a tool in the development of database management on the internet.

The result has found that the developed system is easy to store the data, convenient and fast. The data is accurate can also be produced and the users can pull up the information they need. Furthermore, suggestion has also been made for future development of web application and database system.
