The purposes of this research were 1) to construct computer-assisted instruction on the topic of Transparencies based on the efficiency criteria at 80/80; and 2) to compare the pretest and posttest scores after learning by using computer-assisted instruction on the topic of Transparencies.

The sample of this research were 30 instructors drawn by using simple random sampling technique from instructors of Sripatum University Chonburi Campus. The computer-assisted instruction and the achievement test were utilized as the research instrument. The data were analyzed by using mean, standard deviation and t-test.

The results showed that 1) the computer-assisted instruction had the efficiency at the setting criteria, and 2) The instructors' learning achievement scores after using the computer-assisted instruction on the topic of Transparencies were significantly higher than pre-test scores at .05 level.
