

Peera Sripraphan 2009: A Construction of Football Skills Test for Rangsit University Students. Master of Arts (Physical Education), Major Field: Physical Education. Department of Physical Education. Thesis Advisor: Associate Professor Boonsong Kosa, Ph.D. 162 pages.

The purpose of this research was to construct football skills test and norms for Rangsit University students. The test consisted of five items: 1) passing ball 2) ball stopping 3) ball dribbling 4) ball heading 5) goal shooting. The face validity of the tests were agreed on by 7 experts. The test-retest method was used to determine the reliability with a sample of 50 students, 24 boys and 26 girls in a seven-day interval. The objectivity was tested by scoring judgment of two testers. The sample selected were students, which consisted of 179 boys and 105 girls. The data were analyzed by using mean, standard deviation, Pearson product moment correlation coefficient and T-score for normal criteria construction.

The results on the construction of football skills test for Rangsit University students for passing ball, ball stopping, ball dribbling, ball heading and goal shooting were the following: reliability for male students were 0.89, 0.83, 0.89, 0.89, 0.88 and for female students were 0.87, 0.82, 0.88, 0.89, 0.87 respectively. Objectivity for male students were 0.99, 0.95, 0.99, 0.99, 0.97 and for female students were 0.98, 0.94, 0.99, 0.97, 0.94 respectively.

It was concluded that the skills test had a suitable quality for application to Rangsit University.
