

ACKNOWLEDGEMENTS

I would like to express my sincere gratitude and deep appreciation to my advisor, Asst. Prof. Chalernporn Ongvarrasopone for valuable advice, encouragement, supervision and continuous support throughout this research. Her kindness helped me to get through my difficult period.

I am very grateful to my co-advisors, Prof. Emeritus Sakol Panyim, Assoc. Prof. Apinunt Udomkit and Dr. Pongsopee Attasart for their helpful comments, valuable guidance, proof reading and encouragement in this research.

I would like to thank Asst. Prof. Wanchai Assavalapsakul for providing suggestion and acts as the external examiner of the thesis defense.

I would like to thank Asst. Prof. Witoon Tirasophon for your kindness in thesis defense and providing suggestions for improvement.

My sincere appreciation is expressed to Mrs. Jarasporn Tangkhabuanbutra, Ms. Pratsaneeyaporn Posiri, Mr. Ekapol Chomchay and Ms. Chaweewan Chimawei for their training and help.

This study was supported by grant from National Research Council of Thailand for financial support. The tuition fee was partially supported by Molecular Genetics and Genetic Engineering (MGGE) program, Institute of Molecular Biosciences, Mahidol University.

Finally, I would like to thank to my dear family for their love and warm encouragement.

Kwanruean Benjawan
