

ACKNOWLEDGEMENTS

First of all, I would like to express my sincere gratitude and appreciate to my advisors, Associate Professor Upa Kukongviriyapan, Professor Veerapol Kukongviriyapan and Associate Professor Patchareewan Pannangpetch for their supervision guidance, invaluable advice, kindness and continued encouragement, which enabled me to carry out my thesis successfully.

I acknowledge with gratitude to Professor Stephen E. Greenwald for suggestion about immunohistochemistry techniques and histomorphometric analysis, and Assistant Professor Poungrat Pakdechote for suggestion about mesenteric artery bed experiment. I am also very grateful to Assistant Professor Supawan Thawornchinsombut from Department of Food Sciences and Technology, Faculty of Technology, Khon Kaen University and Dr. Praphassorn Surawattanawan of Government of Pharmaceutical Organization (GPO) for kindly providing rice bran peptides and curcumin used in this study, respectively.

Deep appreciation is extended to Associate Professor Yuvadee Wongkrajang for her suggestions and kindness to serve as the examination committee.

My gratefulness is also expressed to all of my teachers for their instruction, staff of the Department of Physiology, Faculty of Medicine and staff of the Northeast Laboratory Animal Center, Khon Kaen University for their cooperation and help.

I would like to extend my gratitude to Dr. Saowanee Nakmareong and my laboratory colleagues for their guidance of experimental techniques and I also sincerely thankful for time spent and attention from them. The team has been a source of friendships as well as good encouragement and understanding.

Grateful thanks are extended to the Royal Golden Jubilee, Ph.D. program, the Thailand Research Fund, for a scholarship supporting my study, and to the Graduate Research Grant 2013 from the National Research Council of Thailand. Special thanks to grants from the British Council PMI2 Grant (#RC53), the Faculty of Medicine and the Graduate School, Khon Kaen University for financial support for my research.

Finally, I would like to thank my family for all their love and understanding throughout the study. Without their support, my success would not come.

Orachorn Boonla
