

บรรณานุกรม

นักสิทธิ์ ภูวัฒนา การถ่ายเทความร้อน พิมพ์ครั้งที่ 3 ฟิสิกส์ชั้นเตอร์

- Ammar, A.S.S ,Ei-Osairy, M.A and Ghonem, A.A 1991. Comparison of measured and predicted performance of heat storage unit packed with spheres of local material. Technical note (1.2)
- Anzelius, A. 1926. On heating by means of percolating media. Z.Ang.Math Mech. (6): 291
- Bosidet, A., and Peube, J.L. 1979. Thermal storage in rock bed. proceeding of the international. Solar energy society (2): 599-602
- Chandra , Pitam and Willits,D.H. 1981. Pressure drop and heat transfer characteristics of air-rocked thermal storage system .Solar energy (27): 547-553
- Colburn , Allan, P. 1931. heat transfer and pressure drop in empty baffled and packed tube I-heat transfer in a packed tubes. Industrial and engineering chemistry (123)
- Furnan, C.C. 1930. Heat transfer from a gas steam to a bed of broken solid. Trans. Am. Inst. Chem. Engrs, (24): 142
- Furnan, C.C. 1932. Heat transfer from a gas steam to a bed of broken solid. U.S. Bur. Mines Bull 361
- Gamson, B.W., Thodos, G. and Hougen, O.A. 1934. Trans. Am. Inst. Chem. Engrs (29): 1
- Hughes, P.J., 1925. The Design and Predicted performance of Arlington house. Master's Thesis in mechanical engineering university of Wisconsin-Madison
- Hughes, P.J., Klein, S.A. amd Closed, D.J. 1976. Packed bed thermal storage models for solar air heating and cooling system. Journal of heat transfer (18): 336-338
- Jacob, Max, 1957. Heat transfer Volume II , New York wiley
- John, M., Canpbell and Huntington, R.L. 1951. Heat transfer and pressure drop in fixed bed of spherical and cylindrical solid. Petroleum refiner (30)
- Kilinknenberg, A. 1948. Ind. Eng.Chem. (40): 1992-1994
- Kilinknenberg, A. 1962. Equation for transient heat transfer in packed bed. Am. Inst. Chem. Engrs (8): 703
- Kinney, S.P. 1927. The blast-Furnace Reaction. Tech. Reper 391, Bur. of Mines.

- Kuhn, J.K., Von Fuchs, G.F., Warren, A.W. and Zob, A.P. 1978. Developing and upgrading of solar system thermal energy storage simulation models. Contract No EG-77 -C-02-4482 Boeing Computer services company Washington
- Lof, G.O.G and Hawley R.W. 1948. Unsteady-State Heat Transfer Between Air and Loose solids. Industrial and Engineering Chemistry (40)
- MacLaine-Cross, I.L. 1980. Effect of Internal Fluid Heat Capacity on Regenerator Performance. Journal of Heat Transfer (102)
- McGowan, P.L. 1988 Convection stability in horizontal and inclined air layers Ph.D.'s Thesis, University of Melbourne
- Nusselt, W. 1911. Z. ver. deut. Ing (55): 2021-2024
- Ogawa, Kohei, Yushikawa, Shiro and Jun Sug Lee 1991. Effect of packing arrangement of flow characteristics and mass transfer on the surface of a packing sphere. Journal of chemical engineering of Japan (24)
- Riaz, M. 1977. Analytical solution for single and two-phase models of packed-bed thermal storage system. Solar energy (21): 489-492
- Riaz, M. 1978. Transient analytical of packed-bed thermal storage system. Solar energy (22): 123-128
- Schmidt, F.W. and Szego, J. 1976. Transient response of solid sensible heat thermal storage units-singles fluid. Journal of heat transfer
- Schumann, T.E.W 1928. Heat Transfer : a Liquid Flowing Through a Porous Prism. Heat Transfer (208)
- Shewen, E.C., Sullivan, H.F., Hollands, K.G. and Balakrishnam, A.R. 1978 A heat storage subsystem for solar energy. Report Store-6, Waterloo Research Institute, university of Waterloo Canada
- Spiga, G. 1981 A rigorous solution to a heat transfer two phase model in porous media and packed beds. Int. Journal of heat transfer and mass transfer (24): 355-364
- Trinestsampan Natavut Thermal Rocked-bed Storage Performance Master's Thesis, Asian Institute of Technology, Thailand
