Degree	Master of Science (Information Technology and Management)
Independent Study Advisor	Lecturer Dr. Samerkae Somhom

ABSTRACT

The objective of this study, “Development of an Online Information Management System for District Web Sites, Chiang Mai Province”, is to create and update webpage to be easy to use. Thus, user is no need to have skill of writing webpage, so the program can solve the problem of lack of programmer. It is also get rid of information on website which is not up to date.

The application requires installation in a .NET Framework server. The output of the program divided into two parts; administrator and general people. Administrator can update, change and delete the data. For general people, they can see all data of each Amphoe(District) via website.

The result of the study after evaluating this system is that the user can easily install the program, and satisfied in inserting, updating and deleting the webpage and it can be implemented on the reality according to user’s requirement.
