Independent Study Advisor	Lecturer Dr. Rattasit Sukahuta

ABSTRACT

The purpose of this study is to develop an information systems for administrative work at Boonmeetracter Company Limited,Lampang Province. The software was developed using Microsoft Visual Basic 6.0 and Microsoft Access 2002 data storage. The system consists of two groups of users: the first group of users is responsible for collecting data and performing information searching. The second group are those administrative users who maintain the system security.

The evaluation of developed software was done by means of questionnaire. The response for “good” was accounted for 87.50 % of users regarding the application of the software, the design on the frontpage and its data entry procedure, and the instruction manual. 95 % agree at “good” regarding its security and data access for different users. And 85 % agree at “good” regarding its convenience compared to the previous system, the accuracy of its report, and its efficiency on data searching for current data.
