

ACKNOWLEDGMENTS

This independent study could not have been accomplished without the support from many people. I would like to take this opportunity to express my gratitude to all who have contributed to the success of this study. The first person is my advisor, Associate Professor Nittawa Yuangsri who continuously reviewed and made suggestions until this study was completed. Next are my family, parents, sister and all relatives for their cheerfulness and help throughout this course. Last but not least, I would like to sincerely thank my beloved friends who encouraged to each other all the time. All of you are my best friends. Finally, I would like to thank all teachers and staff at LITU, especially P'Wan for all support and kindness during these two years.
