

ACKNOWLEDGMENTS

I would like to express my gratitude to my academic advisors Professor Dr. Saichol Ketsa for his supervision, helpful suggestions and kind support throughout this study. I would like to express my sincere thank to Associate Professor Dr. Krisana Krisanapook and Dr. Parichart Burns for their guidance and corrections during writing of this thesis as well as their encouragement.

All laboratory works were carried out in the Postharvest Research Unit, Central Laboratory and Greenhouse Complex, Kamphaeng Saen Campus, Kasetsart University and Mann Laboratory, Department of Plant Sciences, University of California, Davis, USA. I extend my thanks to all the researchers, staffs and post-graduate students for their kind help. Special thanks are also given to Professor Dr. Michael Reid, Dr. Cai-Zhong Jiang (Mann Laboratory) and Professor Dr. Wouter G. van Doorn (Wageningen University), for their valuable comments.

I am indebted to the Thailand Research Fund for awarding me a scholarship to undertake this study and also to the Postgraduate Education and Research Development Project in Postharvest Technology, Kasetsart University for partially financial support.

Finally, I wish to express my deep thank devoting to my family, particular my parents and my sister, and my friend who always gave me encouragement throughout my study.
