TABLE OF CONTENTS	i
LIST OF TABLES	iii
LIST OF FIGURES	iv
LIST OF ABBREVIATIONS	vi
INTRODUCTION	1
OBJECTIVE	3
LITERATURE REVIEW	4
Porcine Reproductive and Respiratory Syndrome (PRRS)	4
Porcine Reproductive and Respiratory Syndrome Virus (PRRSV)	8
<i>Arteriviridae</i> Family	14
Diagnosis	15
Prevention and control	17
Expression and purification system of recombinant proteins	18
MATERIALS AND METHODS	22
PRRSV Isolates	22
Detection of PRRSV positive samples and differentiation between North American and European strains of PRRSV	22
Cloning for phylogenetic analysis of the ORF7 genes encoded N protein	24
Cloning for expression recombinant N proteins of ORF7 genes of PRRSV	25
Expression of the recombinant N proteins	26
Purification of the recombinant N proteins using Ni-NTA	29
Development of an enzyme-linked immunosorbant assay (ELISA) using purified recombinant nucleoproteins	31
RESULTS	34
Development of the Nested RT-PCR assay for differentiation between North American and European strains of PRRSV	34
Phylogenetic analysis of the ORF7 genes encoding N protein	36

## TABLE OF CONTENTS (Continued)

	<b>Page</b>
Cloning of N proteins of the European and North American isolates of PRRSV	45
Expression of the recombinant N proteins	46
Purification of the recombinant N proteins using Ni-NTA	51
Development of recombinant N proteins (rN proteins) indirect enzyme-linked immunosorbant (I-ELISA) assay	56
DISCUSSION	59
Differentiation between North American and European strains of PRRSV	59
Cloning of ORF7 genes for Multiple alignmetn and Phylogenetic analysis	59
Expression of recombinant N proteins in <i>E.coli</i>	60
Detection antibody against recombinant N proteins by indirect enzyme-linked immunosorbant assay (ELISA)	61
CONCLUSION	62
LITERATURE CITED	63
APPENDICES	
Appendix A	88
Appendix B	101
Appendix C	106
Appendix D	113

## LIST OF TABLES

<b>Table</b>	<b>Page</b>
1 Comparative characteristics of ORFs 2 to 7 products of North American and European strains of PRRSV	11
2 Expected molecular weight increasing followed peptide tagging	21
3 Oligonucleotide primers for the RT-PCR and the nested PCR amplification and typing of PRRS viruses.	23
4 Results of 300 field serums examined by rN proteins ELISA and IDEXX ELISA tests.	58
5 Comparison of sensitivities and specificities of the rN proteins ELISA and IDEXX ELISA used for the detection of antibodies against PRRSV	58

### Appendix Table

1 Sources of the serum samples and amount sera for each method	89
2 Raw data for evaluating rN-I ELISA reactivity	90

## LIST OF FIGURES

Figure		Page
1	Schematic representation of porcine reproductive and respiratory syndrome virus	10
2	Genome organism of PRRSV	12
3	Analysis of the PCR differentiation assay for the European (A) and the North American strain (B) of PRRSV	35
4	Agarose gel electrophoresis analysis of ORF7 gene of the European and North American strains	36
5	Agarose gel electrophoresis analysis of the PCR results and restriction endonuclease assay of the recombinant plasmid containing the whole ORF7 of the European and North American strains	37
6	Sequence alignment of ORF7 of both strains comparison to reported ORF7 gene sequences from GenBank using DNASIS and ClustalW program	42
7	Phylogenetic trees based on nucleotide sequence and amino acid sequence of the European and North American strains of PRRSV	44
8	Agarose gel electrophoresis analysis of PCR products of ORF7 from ORF7-pGEM-T EASY plasmids	45
9	Agarose gel electrophoresis analysis of the PCR products of the selected clone of the transformed <i>E.coli</i> strain Top 10	46
10	SDS-PAGE analysis of the various concentration of the arabinose for the induction of recombinant N protein of the European strain	47
11	SDS-PAGE analysis of the various concentration of the arabinose for the induction of recombinant N protein of the North American strain	48
12	SDS-PAGE analysis of the optimal time for the expression of the recombinant N protein of the European strain	49

## LIST OF FIGURES (Continued)

Figure		Page
13	SDS-PAGE analysis of the optimal time for the expression of the recombinant N protein of the North American strain	50
14	SDS-PAGE analysis of the expression of the recombinant N proteins using 0.002% final concentration arabinose and 4 hours incubation	51
15	SDS-PAGE analysis of the purified recombinant N proteins of the European and North American strains	52
16	Dot blot analysis of crude and purified recombinant N proteins	53
17	Western blot analysis of the immunological reaction between the purified recombinant N proteins and the protein purified from normal <i>E.coli</i> strain Top10 with the anti-histidine monoclonal antibody	54
18	Western blot analysis of the immunological reaction between the crude and purified recombinant N proteins and protein purified from normal <i>E.coli</i> strain Top10	55
19	Reactivity analysis	57

### Appendix Figure

1	The pGEM <sup>®</sup> -T Easy cloning vector	114
2	The pBAD Directional TOPO <sup>®</sup> expression vectors	114
3	Regulation of the arabinose operon in <i>E. coli</i>	115

## LIST OF ABBREVIATIONS

μl	=	microlitre
ml	=	millilitre
μg	=	microgram
mg	=	milligram
bp	=	base pair
kDa	=	kilodalton
pmol	=	picomole
mM	=	millimolar
M	=	molar
U	=	unit
DNA	=	deoxyribonucleic acid
RNA	=	ribonucleic acid
dNTPs	=	deoxynucleotide triphosphate
PCR	=	Polymerase Chain Reaction
EtBr	=	ethidium bromide
UV	=	ultraviolet
SDS-PAGE	=	Sodium Dodecyl Sulfate Polyacrylamide Gel Electrophoresis
rpm	=	round per minute
°c	=	degree celcius
<i>E. coli</i>	=	<i>Escherichai coli</i>
