

ACKNOWLEDGEMENTS

I would like to express my gratitude and feeling deeply indebted to my thesis advisor, Assoc. Prof. Dr. Suwattana Chittaladakorn, for his splendid guidance, encouragement and valuable suggestions during the course of my Ph.D. program. I would like to thank Dr. Somkiat Prajamwong, Assoc. Prof. Dr. Asanee Kawtrakul, and Dr. Visoot Verasan my committees, and also Assoc. Prof. Dr. Chatdanai Jiradacha from Graduate School for their valuable comments and suggestions on this research and corrections of the manuscript.

I sincerely thank Prof. Dr. G.V.Skogerboe who initiates the cooperative doctoral program between Kasetsart University and Utah State University (USU); and I gratefully thank Assoc. Prof. Dr. Gary P. Merkley for his helps during my graduate study and research work at Department of Biological and Irrigation Engineering, USU for a year.

I gratefully appreciate the support of my superiors in Walailak University for their approval of my leave of absence to pursue a Ph.D. degree at Kasetsart University and the Commission on Higher Education, Ministry of Education for financial support during my studies.

Finally, I wish to express my deepest gratitude towards my parents, sister, wife, son, friends and relatives for their continuing encouragements.

Pakorn Ditthakit
