	Page
TABLE OF CONTENTS	i
LIST OF TABLES	iii
LIST OF FIGURES	vi
INTRODUCTION	1
OBJECTIVE	3
LITERATURE REVIEW	4
Banana	4
Drying	5
Glass Transition	8
Water Activity of Foods	12
Water Sorption Isotherm and Glass Transition in Foods	19
Application of Glass Transition Concept in Foods	23
Physicochemical Properties of Food and Food Stability	26
Effect of Glass Transition on processing and Storage	27
Glass Transition Temperature and Molecular Weight	32
Maltodextrin	33
METERIALS AND METHODS	35
Materials	35
Methods	35
RESULTS AND DISCUSSION	45
Determination of the Moisture sorption Isotherm of Banana powder	45
Glass TransitionTemperature (T_g) of Banana Powder	47
Correlation of Glass Transition Temperature and Water Activity / Water Content of Banana Powder, Apply the Appropriate Mathematic Models	50
Development of Banana Flake Product Using Maltodextrin	52
Effect of Storage Temperature on Qualities of Banana Flake	65
