

ACKNOWLEDGEMENT

I wish to express my deepest gratitude and sincere appreciation to Assoc. Prof. Dr. Sutatip Siripaisarnpipat, who served as my advisor during the course of my graduate work, for her patience, encouragement and valuable advice and suggestions. I also take this opportunity to thank Assoc. Prof. Dr. Ladda Meesuk and Assist. Prof. Atchana Wongchaisuwat, as thesis committee members, for their valuable suggestions. I am very grateful to Assoc. Prof. Dr. Pornsawat Wathanakul, the Graduate School representative, for her suggestion. I am particularly grateful to Assoc. Prof. Dr. Paisan Kongkachuichay from Department of Chemical Engineering for the valuable discussion about TG-DTA results.

Special appreciation is given to Mr. Satron Wongdee, Miss Tanwawan Duangtongyou, Miss Pakvipar Chaopanich, Miss Panana Kitipaisarnon, Miss Upsorn Boonyang and Mr. Wachirapun Punkawee for their helps, and to all of my friends who are not named here for their friendship during the period of this study.

Finally, I wish to dedicate all my works to my parents and my family who encouraged and supported me and provided me a chance to experience the world of science and learning.
