

ACKNOWLEDGEMENTS

My deep appreciation goes to my thesis advisor, Associate Professor Praparat Hormchan for her kind support, guidance on manuscript preparation and encouragement throughout the course of this study. I have always regarded her advice very highly.

I also wish to express my sincere thanks to the thesis committees, Associate Professor Arunee Wongpiyasatid and Assistant Professor Arunee Engkagul for their precious guidance in manuscript reviewing, encouragement as well as for letting me use the facilities in the duration of my laboratory work.

The great appreciation go to Assistant Professor Peeranuch Jompuk, the Graduate School representative and Associate Professor Chusak Jompuk for their valuable advice in manuscript preparation and statistical analysis.

Special thanks are given to Ms. Anusorn Wisessing and my friends for their help, guidance and friendship during this study.

I would like to dedicate this work to my parents, my sister and my brother for their encouragement, moral and spiritual support, especially for their pray, love, patience and understanding.

This study was financed by the government's research fund allocated through the Graduate School of Kasetsart University.
