POL. LT. COL. PATIVETA CHULINTHORN : THE DEVELOPMENT AND
IMPLEMENTATION OF A SUPPLEMENTARY READING BOOK ON THE ENVIRON-
MENTAL LAW FOR POLICE CADETS. THESIS ADVISOR: SUBPHACHAI SUKARAWAN
M.A., RACHANONT SUPAPONGPICHATE, Ph.D., KAMONTIP KHATIKARN, Ph.D.
159 p. ISBN 974-661-016-3

The purpose of this research is to develop a supplementary reading book on the environmental law. The book is expected to be used by the third year police cadets who learn the criminal law subject (LA 3210), of the police cadet curriculum B.E. 2538.

In carrying out the research, a supplementary reading book was structured, written, and developed. Necessary environmental law content with four cases studies was included in the book. The achievement test, the satisfaction test, and the expert's rating forms were developed. The research design of pretest and posttest controlled groups were used for testing the quality of the book. Altogether, 70 third year police cadets were randomly selected by the simple random sampling technique. The subjects were divided into two groups, the experimental and the control group, with 35 subjects in each group. Data were collected and analysed by the computer.

Analysis of data revealed that the posttest scores of the experimental group were significantly different from the pretest scores. The posttest scores of the experimental group were also significantly higher than the posttest scores of the control group. Data showed that the experimental group of police cadets rated their satisfaction with the supplementary reading book as good. The experts also rated the book as good and appropriate.

It is therefore recommended that the book should be considered to be used as a supplementary book in the subject of criminal law in the police cadet curriculum B.E.2538.
