

## **ACKNOWLEDGEMENTS**

This work was completed with a lot of help from my advisor, my co-advisors and my colleagues. I would like to express my sincere gratitude and grateful thank to my advisor, Dr. Kanokwan Romyanon, for her guidance, support and encourage throughout my M.S. study.

I gratefully thank to Dr. Srimek Chowpongpan, Associated Professor Supat Attathom, my co-advisors and Dr. Luksana Kantama, a representative from the Graduate School for their comments and suggestions in completing the writing of this thesis.

I would like to thank Mrs. Nuchnard Warin, Ms. Anjana Bhunchoth, Ms. Namthip Phironrit and members of Plant Research Group (BIOTEC) for their helpful, advices and teaching in molecular techniques.

This is my honor for a scholarship from National Center for Genetic Engineering and Biotechnology (BIOTEC), National Science and Technology Development Agency (NSTDA) for M.S. program.

This thesis was financially supported from BIOTEC, International Service for the Acquisition of Agri-biotech Applications (ISAAA) and Center for Agricultural Biotechnology (CAB), Kasetsart University.

Finally, I would like to express all my family and my friends for their support and encouragement throughout my study.

Paweena Kasemsin
