| TABLE OF CONTENTS.....   | i           |
| LIST OF TABLES.....  | iii         |
| LIST OF FIGURES.....   | vi          |
| INTRODUCTION.....  | 1           |
| Objectives.....  | 2           |
| LITERATURE REVIEWS.....  | 3           |
| Mafai Jeen.....  | 3           |
| Medicinal uses.....  | 5           |
| Drying.....  | 7           |
| Aroma compounds.....   | 8           |
| Gas chromatography-mass spectrometry (GC-MS) analysis.....       | 12          |
| Astringency.....   | 13          |
| Sensory analysis.....  | 14          |
| Shelf life .....   | 16          |
| Fruit candy.....   | 17          |
| MATERIALS AND METHODS.....                                       | 19          |
| To identify the aroma compounds of Mafai Jeen.....               | 19          |
| To study effect of drying methods on Mafai Jeen .....            | 23          |
| To study the intensity of astringent taste of Mafai Jeen.....    | 27          |
| To develop Mafai Jeen candy with shelf life study.....           | 30          |
| RESULTS AND DISCUSSION.....                                      | 48          |
| To identify the aroma compounds of Mafai Jeen.....               | 48          |
| To study effect of drying method on the Mafai Jeen qualities.... | 61          |
| To study the intensity of astringent taste of Mafai Jeen.....    | 71          |
| To develop Mafai Jeen candy with shelf life study.....           | 78          |
| CONCLUSION.....  | 100         |
| RECOMMENDATION FOR FUTURE WORK.....                              | 103         |

**TABLE OF CONTENTS (continued)**

|                       | <b>Page</b> |
|-----------------------|-------------|
| LITERATURE CITED..... | 104         |
| APPENDIX.....         | 120         |
| CURRICULUM VITAE..... | 134         |

## LIST OF TABLES

| <b>Table</b> | <b>Page</b>  |
|--------------|--|
| 1            | Main extraction methods of aroma compounds..... 9  |
| 2            | Composition of the experimental samples and reference standards..... 29  |
| 3            | Attribute rated by the panel and their definitions used in the descriptive analysis of Mafai Jeen fruit candy..... 38  |
| 4            | Standard reference intensity ratings used in descriptive tests for Mafai Jeen fruit candy..... 40  |
| 5            | Volatile compounds identified in Mafai Jeen (leaf, flesh, skin of fruit, and seed) using headspace sampler with HP-5MS non-polar column..... 50  |
| 6            | Volatile aroma compounds identified in the Mafai Jeen fruit in order of their retention time ( $t_R$ ) using SPME with 100 $\mu\text{m}$ polydimethylsiloxane (PDMS), 85 $\mu\text{m}$ polyacrylate (PA), and 50/30 $\mu\text{m}$ divinylbenzene/ carboxen/PDMS (DVB/CAR/PDMS) fibers coupled to GC-MS..... 55 |
| 7            | Changes of color $L^*$ $a^*$ $b^*$ values and total change ( $\Delta E$ ) for Mafai Jeen at different drying methods (sun drying, vacuum drying at 45 °C, hot air drying at 45 °C, and hot air drying at 60 °C)..... 63  |
| 8            | Proximate composition of fresh and dried Mafai Jeen fruits..... 64   |
| 9            | Mean values for sensory evaluation of dried Mafai Jeen from different drying methods (sun dried, hot air dried at 45 °C, hot air dried at 60 °C, and vacuum dried at 45 °C)..... 65  |
| 10           | Yields of oil in fresh fruit and dried Mafai Jeen by sun dried, vacuum dried at 45 °C, hot air dried at 45 °C, and hot air dried at 60 °C..... 65  |
| 11           | Volatile compounds identified in the Mafai Jeen essential oils; fresh fruit, hot air dried at 45 °C, hot air dried at 60 °C, vacuum dried at 45 °C, and sun-dried in order their retention time ( $t_R$ ) using HP-5MS non-polar column..... 67  |

## LIST OF TABLES (continued)

| <b>Table</b>  | <b>Page</b> |
|---|-------------|
| 12 Time-intensity course in astringent solutions, the results of tannic acid solution ( 1 g/l ) obtained with use of paper ballot 150 mm line scale.....              | 73          |
| 13 Time-intensity characteristics of dry Mafai Jeen with 0, 10, 20, and 30% Sucrose.....  | 74          |
| 14 Time-intensity characteristics of dry Mafai Jeen with 0, 1, and 2% of ascorbic acid.....   | 75          |
| 15 Time-intensity of dried Mafai Jeen modified by additions of taste active substances.....   | 77          |
| 16 The qualities of fresh Mafai Jeen fruits for this experiments.....   | 79          |
| 17 Effect of glucose syrup and sugar concentration on hardness, moisture, $a_w$ , and color value of Mafai Jeen candy.....  | 82          |
| 18 Effect of glucose syrup and sugar concentration on sensory attribute; color, taste, sweet, texture, and overall acceptance of Mafai Jeen candy...                  | 83          |
| 19 The rank sum of preference for three thickening agent added in Mafai Jeen fruit candy.....   | 84          |
| 20 Means, standard deviations and analysis of variance for three Mafai Jeen fruit candy.....  | 86          |
| 21 Demographic and socioeconomic information.....   | 89          |
| 22 Consumer product information of Mafai Jeen fruit candy.....  | 91          |
| 23 Means, standard deviations and analysis of acceptability attributes of the three Mafai Jeen fruit candy.....   | 92          |
| 24 Purchase intent responses for 2.0% maltodextrin DE 10 added in Mafai Jeen candy before and after knowing that the product was enriched with health-promoting ..... | 93          |
| 25 Purchase intent responses for 1.5% pectin (150grade) added in Mafai Jeen candy before and after knowing that the product was enriched with health-promoting .....  | 93          |

## LIST OF TABLES (continued)

| <b>Table</b> |   | <b>Page</b> |
|--------------|---|-------------|
| 26           | Purchase intent responses for 1.0% CMC (PM 7) added in Mafai Jeen candy before and after knowing that the product was enriched with health-promoting..... | 93          |
| 27           | McNemar test results of three Mafai Jeen fruit candy with different thickening agent.....   | 94          |
| 28           | The proportion of consumer answered yes to purchase before and after informed about the health benefits of the products.....                              | 95          |

## LIST OF FIGURES

| <b>Figure</b>   | <b>Page</b> |
|---|-------------|
| 1 Dried Mafai Jeen process.....   | 6           |
| 2 Flow chart of dried Mafai Jeen process.....   | 23          |
| 3 Flow sheet of Mafai Jeen candy process.....   | 31          |
| 4 Distribution of chemical classes of aroma compounds in Mafai Jeen fruit by DVB/CAR /PDMS, PA, and PDMS fibers.....  | 60          |
| 5 Drying time curve at different drying methods (sun drying, vacuum drying at 45 °C, hot air drying at 45 °C, and hot air drying at 60 °C)...   | 61          |
| 6 Drying rate curves for Mafai Jeen at different drying methods ( sun drying, vacuum drying at 45 °C, hot air drying at 45 °C, and hot air drying at 60 °C).....  | 62          |
| 7 Time-intensity curves for a single assessment of tannic acid solution 1 g/l, for each of 9 assessors. Increasing time-intensity scores are indicative of increasing astringency.....                    | 72          |
| 8 Time-intensity characteristics of tannic acid solution at 7 and 25 °C....   | 73          |
| 9 Time-intensity characteristics of dry Mafai Jeen with 0, 10, 20, and 30% sucrose.....   | 74          |
| 10 Time-intensity characteristics of dry Mafai Jeen with 0, 1, and 2% of ascorbic acid.....   | 75          |
| 11 Time-intensity characteristics of dried Mafai Jeen at 0, 1, 2% ascorbic acid and 0, 10, 20, 30, 40% sucrose.....   | 76          |
| 12 Average curves for each assessor from dried Mafai Jeen. Each curve is averaged over approximately 36 individual curves. Increasing time-intensity scores are indicative of increasing astringency..... | 78          |
| 13 Spider web diagram of average scores obtained by descriptive analysis of Mafai Jeen fruit candy, in appearance, aroma, taste, and flavor.....  | 87          |
| 14 Spider web diagram of average scores obtained by descriptive analysis of Mafai Jeen fruit candy, in texture.....   | 88          |

## LIST OF FIGURES (continued)

| <b>Figure</b>           | <b>Page</b>  |     |
|-------------------------|--|-----|
| 15                      | Moisture contents (a) and water activity (b) of Mafai Jeen fruit candy stored at various time condition in oriented polypropylene (OPP) and aluminum laminated foil (AL/Foil) pouches.....   | 96  |
| 16                      | Color $L^*$ value (a), color $a^*$ value (b), and color $b^*$ value (c) of Mafai Jeen fruit candy stored at various time condition in oriented polypropylene (OPP) and aluminum laminated foil (AL/Foil) pouches...  | 97  |
| 17                      | Mean hedonic rating (9-point scale, 1=dislike extremely, 9=like extremely) on color score (a), taste score (b), texture score (c), and overall acceptance score (d) of Mafai Jeen fruit candy stored at various time condition in oriented polypropylene (OPP) and aluminum laminated foil(AL/Foil) pouches..... | 98  |
| <b>Appendix Figures</b> |  |     |
| A1                      | The Mafai Jeen varieties in Thailand .....   | 121 |
| B1                      | The Clevenger-type apparatus hydrodistillation extraction.....   | 122 |
| B2                      | Gas chromatography-mass spectrometry (GC-MS) instrument.....   | 122 |
| C1                      | Visual appearance of dried Mafai Jeen with various drying methods...   | 123 |
| C2                      | Apparatus for headspace extraction.....  | 123 |
| C3                      | Focus group discussion in Nan Province.....  | 124 |
| C 4                     | Focus group discussion in Bangkok.....   | 124 |
| C 5                     | Training of panelists in sensory descriptive analysis of Mafai Jeen candy.....   | 125 |
| C 6                     | Mafai Jeen fruit candy.....  | 125 |
| C 7                     | A trained panelist performing sensory evaluation of Mafai Jeen fruit candy in partitioned booth.....   | 126 |
| D1                      | Ballot used in the ranking of preference for Mafai Jeen fruit candy products.....  | 127 |
| D2                      | Ballot used in the descriptive analysis for Mafai Jeen fruit candy products.....   | 128 |
| E1                      | Consumer study questionnaire.....  | 131 |
