

ACKNOWLEDGEMENT

First and foremost, I would like to thank my advisor (research director), Assist. Prof. Dr. Nattamon Koonsaeng for giving me with generous guidance, expert advice through all stages of this research and other wide-ranging research project. I would also like to thank Assist. Prof. Dr. Sudjit Sanguanruang, Dr. Apirat Laobuthee and Dr. Bussarin Ksapabutr, members of committee for their valuable suggestion and criticism.

I wish to acknowledge the The Ministry of University Affair under the Science and Technology Higher Education Department Project (MUA-ADB funds), TRF Senior Research Scholar to Prof. Dr. Jumras Limtrakul, Kasetsart University Research and Development Institute (KURDI) and Chemistry Department, Kasetsart University for financial assistance that supported this work.

Finally, I would like to thank my parents and my friends, who have given me support and encouragement throughout my graduate career. Their love and companionship have been an essential source of strength to me during the course.

Panitat Hasin
