

ACKNOWLEDGEMENTS

Praise Allah (S.W.T.) who always care and make me to attempt until all the work have been done. Thank you all the teachers and professors in the College of Environment, Kasetsart University for all the knowledge which use to do this thesis. All the theory and pratical mixing and done together here.

I am profoundly indepted to my thesis advisors Associate Professor Dr.Patana Anurakpongsatorn, Assistant Professor Dr.Jukkrit Mahujchariyawong, Associate Professor Dr.Preeda Parkpian, for there direction, encouragement and advise me in everything and every problem.

This project was funded by RTG/TCE schorlarship. I wish to thank The Department of Environmental Science, Faculty of Science, Kasetsart University, Asian Institute of Technology (AIT) Thailand where let me use the laboratory. Also to Miss Shotika Dit-umnat and Miss Pongsuk Pipattanachalalai for help doing everything and make everything done on time.

At last, my appreciation devotes to my dad, my mom, my sister, everyone in my family and Mr.Anuchah Kalekele who always give me heartfelt supports.
