

LIST OF TABLES (continued)

Table		Page
12	Mean serum levels of triiodothyronine (T ₃) thyroxine (T ₄), insulin and leptin of the cows kept in normal open shed (NEVAP) and evaporative cooling shed (EVAP)	60
13	Feed composition of Paragrass (<i>Brachiaria mutica</i>) and commercial concentrates used in the present study	64
14	Macro environment in the SS and DS areas of the animal house during the experimental period	65
15	Mean values of physiological responses of the dairy cows raised in SS and DS sheds under hot-humid conditions	65
16	Mean values of production performances of the dairy cows raised in SS and DS sheds under hot-humid conditions	66
17	Mean values of various hormones (Cortisol, T ₃ , T ₄ , IGF-1, leptin) of the dairy cows raised in the SS and DS animal houses in the hot-humid conditions	67
