

LIST OF FIGURES

Figure		Page
1	A pure blood Holstein Friesian is panting under severe heat stress	8
2	The partition of heat losses from <i>Bos taurus</i> cows	11
3	Schematic of stages of the estrous cycle, serum progesterone concentrations, and serum luteinizing hormone (LH) concentrations	17
4	Holstein cows in Central Thailand utilizing natural shade	26
5	Holstein cows in Western Thailand avoiding solar radiation	26
6	Holstein cows preferred shaded house than shade from the trees	26
7	Mean monthly (a) Ambient temperature, (b) Relative Humidity and (c) Temperature-Humidity-Index values (2000 -2002) of the Sakol Nakhon Weather Station (Thai Department of Meteorology, 2003)	44
8	Diurnal variations in black globe temperatures of the DS and SS sheds. (Means values of adjacent histograms with different superscripts are significantly difference ($P < 0.01$))	48
9	Ambient temperatures (a), Relative Humidity (b) and Temperature Humidity Index (c) in the DS and SS areas of the animal house	49
